Jimmy

5-door

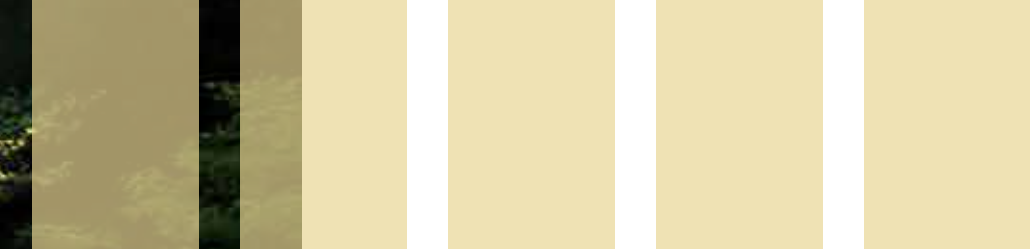

Nobody But Jimny

Choosing a 4x4 vehicle just got a lot easier.

Because nobody but Jimny offers such a superbly balanced combination of authentic off-road ruggedness and light, nimble, manoeuvrability.

What's more, the new 5-door model gives you expanded carrying capacity and truly comfortable seating for four adults.

Scan the far horizons and you will see — there is nothing else like it on Earth.

Go ahead and go wild

Load up your gear and head into the wilderness — Jimny has what it takes to handle the toughest terrain. With a long heritage of off-road adventuring to draw on, it's a trusted partner you can count on to carry you wherever you want to go. And when there's no more road to follow, there's no need to turn back. With Jimny, you can go ahead and go wild.

EXTERIOR

Functional evolution

Like a wild animal, every element of Jimny's body design has evolved to achieve the goal of functional perfection. It's purpose-built to help you survive in the wild and get the job done.

Iconic 5-slot front grille and round headlamps

Jimny's off-road heritage is evident in its iconic round headlamps and signature 5-slot front grille with chrome accents.

Optimised bumper design

Moulded front and rear bumpers made from scuff-resistant black material feature an optimised design that provides ample approach and departure angle clearance for driving in rough terrain.

LED headlamps with washers

GLX grade models feature LED projector headlamps equipped with individual washers to help ensure bright illumination even when driving in mud, dirt or snow.

Alloy wheels

15-inch alloy wheels with a dark grey metallic finish complement Jimny's rugged styling, and flared wheel arch mouldings and side sill splash guards help shield the body from mud and gravel.

Upright A-pillars

Upright A-pillars increase your field of vision and reduce blind spots, while the minimally slanted windshield helps cut glare from the overhead sun.

Square bonnet

The flat, square shape of the bonnet contributes to heightened situational awareness on uneven ground because the full width of the vehicle is always in view.

INTERIOR

On course for adventure

Jimny's ergonomically designed cockpit and dashboard instrumentation provide ready access to essential controls and vehicle information when you're navigating rough terrain.

Display audio system*

The display audio system has a customisable touch panel that lets you view vehicle information and live video from the rearview camera. The system also supports Bluetooth® for hands-free calling and music playback, and Wi-Fi® and USB connectivity for touch panel and voice-activated access to smartphone navigation and messaging apps.

* Option package with 9-inch screen and rearview camera (GLX grade) or 7-inch screen (GL grade).

Front console box

Conveniently positioned switches in the front console box allow the driver to control the rear seat power windows.

USB and accessory sockets

A 12V accessory socket is included as standard equipment, and a USB socket is also provided on vehicles equipped with the optional display audio system.

Steering wheel integrated switches

Cruise control and audio control switches are integrated into the steering wheel, and on models equipped with a display audio system, there are additional switches for hands-free calling.

Apple CarPlay works with your iPhone and Siri to help you get directions, make calls, play music, and send and receive messages using voice commands or the display audio touch panel interface.

Talk to Google Assistant on Android Auto and get things done with your voice so you can keep your focus on driving. Easily send messages, get directions, control media and more. Just say, "Hey Google" or, in compatible cars, long press the voice control button on your steering wheel to get started.

* Apple CarPlay is supported in the countries listed at the following link: <https://www.apple.com/ios/feature-availability/#applecarplay-applecarplay>
For more details, including iPhone models and iOS versions compatible with Apple CarPlay, see: <https://www.apple.com/ios/carplay/>
